ABOUT ME

I develop scalable, responsive and easy to use web applications using React and Javascript/Typescript with 3+ hand-on experience.

I am also passionate about teamwork and keep me informed about latest technologies, developing exceptionally reliable applications.

WORK EXPERIENCE

Banhcafe - Frontend Developer

May 2024 - Present

Refactored legacy codebase from JavaScript to TypeScript and improved app performance by 40% in internal platforms, collaborating with backend teams to build internal tools from scratch

Developed scalable internal tools, dynamic dashboards, and national-level banking systems, always following the best possible industry practices

Pittsburgh knights - Freelancer

June 2022 - May 2024

Developed and maintained live data systems, automated tournament platforms, and the organization's official website using React.

Collaborated with high-profile partners such as Riot Games to deliver scalable, performant, and engaging digital experiences.

Forkify App - API + MVC, HTML, CSS, JS, Web APIs

I built a modular MVC recipe app with async API, bookmarks, using localStorage and serving size features with responsive design

Implemented error handling and upload logic for seamless recipe management

LANGUAGES

Spanish - Native
